

**Naperville Land Use Master Plan**  
**Summary of Changes Based on Direction Provided by City Council in January 2021**  
**June 21, 2021**

**INTRODUCTION:**

This document provides a summary of changes made to the Naperville Land Use Master Plan in accordance with the direction provided by City Council in January 2021. The summary highlights key modifications and provides a more refined breakdown of changes by chapter.

**BACKGROUND:**

The Naperville Planning and Zoning Commission (PZC) hosted a public hearing for the Land Use Master Plan in March 2020. The PZC was supportive of the plan's guiding principles, focus on key sites and overall format. However, the PZC was not supportive of the recommended single residential land use category on the future land use map. Several residents expressed concerns about the approach, as well. PZC members did not believe the single category would provide clear direction for making recommendations on residential development projects.

On Jan. 5, 2021, PZC and citizen concerns were forwarded to the City Council. After review and consideration of all community input, the City Council directed revisions to provide three categories of residential density, similar to prior plans. This direction was consistent with the input provided by the PZC and public in early 2020. The City Council also agreed with the positive PZC review on all other items in the plan.

**KEY CHANGES:**

Based on City Council direction and development approvals:

- Updated Future Land Use Map, including low, medium and high-density residential designations
- Reduced the number of key sites due to project approvals and construction

**WHAT REMAINS THE SAME:**

Based on the input of the PZC and public, City Council expressed support for the following, which remain in the plan:

- Guiding Principles
- Plan focus on key development sites as places for redevelopment, including potential for achieving future housing goals
- Increased housing opportunities in commercial areas
- Land use recommendations for commercial corridors and neighborhood, urban and regional centers.
- Recommendations to develop zoning amendments to accommodate new residential uses – small lot single-family, tiny homes, accessory dwellings, etc. – to address market trends and community need

## **BREAKDOWN OF CHANGES BY CHAPTER:**

### Chapter 1: Introduction

New preamble added

Clarification of the relationship between any future Fifth Avenue study and the Strategic Plan

### Chapter 2: Community Snapshot

Revisions to the Existing Land Use Map and supporting text relative to:

- Updates to Existing Land Use Map to reflect current conditions and distinguish public and private open space
- Recognition of 5G as a utility investment in Naperville
- Recognition of COVID-19 influence on market conditions, particularly retail

### Chapter 3: Vision and Guiding Principles

- Guiding Principle 1 – Added emphasis to importance of natural resources, open space and affordability
- Guiding Principle 4 – Specified relationship to NEST report and strategies for creation and preservation of open space

### Chapter 4: Land Use Plan

- Carried through clarifications about public and private land use reflected on Existing Land Use Map, recognizing these areas may accommodate future development (e.g. Atwater example of re-use of private recreation space)
- Replaced consolidated “Residential Neighborhood” place type with three more refined, fixed residential sub-categories based on structure and density – “Single Family & Duplex,” “Medium Density,” and “High Density”
- Updated table of primary and supporting uses as it pertains to residential areas
- Removed language about achieving diversity through housing supply options to support City Council position that affordability and land use, while related, are separate issues
- Provided additional direction for considering residential development requests involving increased density to emphasize compatibility with adjacent areas, improvements to neighborhood living, height and transitions between residential place types

### Chapter 5: Application of the Place Types

- Specified recommendation for Medium Density Residential for Spring Avenue (previously consolidated Residential Neighborhood)
- Specified recommendation for Medium Density Residential near Plank Road & Naper Boulevard (Previously consolidated Residential Neighborhood)
- Updated the text to reflect development activity on East Ogden Avenue
- Removed the Naper Commons area from the Regional Center Place Type recommendations following City Council approvals

### Chapter 6: Implementation

- Clarified the role of the Land Use Master Plan as a high-level guide to identify, evaluate, and prioritize future implementation action items (e.g. zoning code amendments)

- Specified relationship to NEST report and strategies for creation and preservation of open space
- Provided context and explanation that plan recommendations are not exhaustive and all-inclusive. Further recognized need to collaborate with other agencies and stakeholders to achieve guiding principals
- Supports development of zoning tools for community consideration that will create additional accessible recreation and open space areas

#### Appendix

- Further streamlined listing of best practices to focus on those most applicable to Naperville
- Added successful Naperville examples of sustainability programs
