	<i>Description: This project involves the modification of an existing office space for use as a vocational training/enrichment center. The scope of work includes the following:</i> <i>Office Area Renovation: The front office area will undergo aesthetic upgrades only. All existing walls and structural components will remain in place. Painting and installation of new carpet throughout the renovated office areas. Installation of additional electrical outlets to accommodate televisions and office equipment. The partition wall in the kitchen area will be removed to create an open layout; note that this wall does not continue above the existing drop ceiling.</i> <i>Break Area Upgrades: Installation of new appliances. Cabinetry upgrades and the addition of a new kitchen island. Construction of new ADA-compliant counterspace.</i> <i>Conversion of Data Closet: The existing data closet located within the kitchen area will be repurposed as a laundry/wash closet.</i> <i>Restroom Renovation: Existing bathrooms will be renovated to meet current ADA compliance standards.</i> <i>Warehouse Modifications: Removal of existing temporary office structures within the warehouse space. Construction of a new private storage room using 10' high partition walls. Construction of a personal studio space with 10' high partition walls. All new wall construction within the warehouse will be non-load bearing and will not interfere with existing fire protection system coverage.</i> <i>No modifications to the existing building structure, egress pathways, or fire-rated assemblies are proposed. Work is primarily limited to interior renovations, with aesthetic and functional improvements.</i> General Contractor: Dave Schramm

MISC-1768-2025	MISCELLANEOUS	PLUMBING	COMPLETE	12/19/2025	633 BUTTONWOOD CR, NAPERVILLE, IL 60540
	<i>Description: removing a section of cast iron in the yard, installing a 6" non directional cleanout tee, and descaling 50' of cast iron. We will dig down to the sewer which runs next to the driveway about 10' deep. We will remove a 15' section of cast iron from the 4" X 6" fitting at the sidewalk, to the end of the flower bed. The cleanout will be installed in the customers front yard in order to clean the sewer in the future. We will bed the new pvc in gravel to prevent shifting in the future. All spoils removed will be placed back in the ditch and remain on site. It is the customers responsibility to have the landscaping redone. Plywood will be laid in front of the tracks of the excavator in order to preserve the grass as best as we can. We will then perform a descale on the entire 4" cast iron sewer. All of the loose scale will be jetted and removed from the sewer. It will all be pushed out to the city main and there will be no scale remaining in the customers sewer. We will camera the rest of the clay that our camera could not reach, in order to ensure it is in good condition. When we perform the descale, there is a possibility there could be holes or cracks in it due to the age. If this is the case, we will go over options with the customer on how to fix the cast. Our descaling equipment does not make holes or damage the pipe, but it may uncover them. The first floor bathroom toilet also flushes very lazily. A new Mansfield elongated comfort height toilet with a 210 kit will be installed at this time. This toilet with the updated parts, will completely flush all of the water from the tank every time it is used. This will optimize the amount of water flow that goes through the sewer. This is a bid and is subject to change upon the day of installation. All of our work will have a one year warranty on parts and labor. We cannot warranty sewer cleaning as we cannot control what goes down the sewer or the condition of the existing pipes.</i>
