**Description:** Re-Secure Meter Bank To Building 1815 Wall: We propose to secure the meter bank to the wall that is pulling away. Utility company will have to turn power supply off to the building. We will have to shut the power down to the building to remove the covers and secure the meter bank to the wall. We will remove the tags and the covers. We will remove the top three meters going across the top of the meter bank. We will drill through the existing mounting holes. We will drill into the building wall. We will use better fasteners to secure the meter banks to the wall. We will move the meter bank closer to the wall securing it. We will put the meters back in place and secure the covers. Main power will need to be turned back on by the city.

<b>Description:</b> This project involves the removal of an existing, aged fence and the installation of a new cedar wood fence in the same location. The new fence will follow the original layout and property lines, with no changes to the existing footprint or encroachment on adjacent properties.				

The replacement fence will be constructed using high-quality cedar wood, known for its natural durability, resistance to decay, and aesthetic appeal. The design and height of the new fence will match the original, unless otherwise required to meet current municipal codes.

This project is intended to enhance the property's safety, privacy, and visual appearance while remaining fully compliant with local building and zoning regulations.

<b>Firepit:</b> No	<b>Gas Line:</b> No	<b>Poured-in-place Foundation:</b> No	<b>Wall Exceeding 3 feet:</b> No	
<b>Description:</b> We propose to remove the existing concrete patio at the homeowner's property and replace it with a new Unilock paver patio measuring 968 square feet. This upgrade aims to enhance both the aesthetic appeal and functionality of the outdoor space. In addition to the patio installation, we will be purchasing a prefabricated gazebo kit from Costco, which will be assembled on-site. The gazebo will be securely anchored with concrete footings for each post, sized at 12 inches by 48 inches, ensuring stability and durability.
