	<i>Description: All of the following will be done using Unilock pavers (PERMEABLE). Installation will be done by C & A Landscaping. This is part of a current residential build being done by Monument Builders.</i> - Patio of approximately 650 square feet with natural gas firepit installed 15+ feet from residence. Gas supply line will be installed by Monument Builders. - Three walkways, each approximately 30 to 35 feet in length totalling 291 square feet of permeable pavers. - In addition, pavers will be used to construct and install landings and step from rear patio door and from porch to walkways on front of the home. - Previously approved grading plan/site survey is provided. In addition, a mark-up of the plan indicating the location of patio, walkways and landings is provided. The mark-up is a 'strong' estimation of location. Any changes will be done to ensure no impact to swale, easement or other occurs. - Photo provided of originally proposed layout of patio. Landing and step is missing but is part of the proposed build. In addition, the fire pit could change from round to rectangular in order to ensure the swale is not impacted. A pic of this style is provided. - Pictures of gas and electric meters provided as requested. No permeable pavers will be in the area of the electrical meter. Pavers will be at a minimum of 3 feet from the gas meter. - As I'm sure all applicants are, we are seeking a quick approval if possible. Looking to start work in August.
