COMM-0515-2025	COMMERCIAL	COMMERCIAL BUILDING ALTERATIO	ISSUED	09/10/2025	1701 QUINCY AV 6, NAPERVILLE, IL 60540
	<i>Description: This project involves the modification of an existing office space for use as a vocational training/enrichment center. The scope of work includes the following:</i> <i>Office Area Renovation: The front office area will undergo aesthetic upgrades only. All existing walls and structural components will remain in place. Painting and installation of new carpet throughout the renovated office areas. Installation of additional electrical outlets to accommodate televisions and office equipment. The partition wall in the kitchen area will be removed to create an open layout; note that this wall does not continue above the existing drop ceiling.</i> <i>Break Area Upgrades: Installation of new appliances. Cabinetry upgrades and the addition of a new kitchen island. Construction of new ADA-compliant counterspace.</i> <i>Conversion of Data Closet: The existing data closet located within the kitchen area will be repurposed as a laundry/wash closet.</i> <i>Restroom Renovation: Existing bathrooms will be renovated to meet current ADA compliance standards.</i> <i>Warehouse Modifications: Removal of existing temporary office structures within the warehouse space. Construction of a new private storage room using 10' high partition walls. Construction of a personal studio space with 10' high partition walls. All new wall construction within the warehouse will be non-load bearing and will not interfere with existing fire protection system coverage.</i> <i>No modifications to the existing building structure, egress pathways, or fire-rated assemblies are proposed. Work is primarily limited to interior renovations, with aesthetic and functional improvements.</i>

MISC-1057-2025	MISCELLANEOUS	ELECTRICAL	ISSUED	09/05/2025	1844 FERRY RD, NAPERVILLE, IL 60563
	<i>Description: Currently there is 500mcm 480-volt cables feeding from the Naperville transformer to the fire pump meter. There is a cable that went bad from the transformer to the meter and we are concerned for the condition of the 3" conduit. The conduit is encased in concrete so its not an easy one to replace. The fire pump motor is rated for 88-amps at 480-volts. Our ask to you is to allow us to downsize to 250mcm USE cable? Once we pull out the existing cables, we would swab, clean and lube the conduit. Our thought is that 250mcm would just be more comfortable in the conduit.</i> Electrical Contractor: Chris Clarke 403 S. 13th Avenue, Saint Charles, IL 60174 (630)549-4600 chris@ccrelectric.com

MISC-1230-2025	MISCELLANEOUS	ELECTRICAL	ISSUED	09/16/2025	2755 NEWPORT DR, NAPERVILLE, IL 60565
	<i>Description: Condensation build up in main feeder raceway has caused electrical components to build up rust over the years. This is due to different temperature drafts. According to electrical code, all compromised electrical components are a fire hazard. Identify and label circuits so that new panel schedule will match the old. Remove and replace electrical panel and circuit breakers. Turn on circuits and test for voltage and proper function. Seal main raceway properly.</i>				
	<i>When opening up panel and identifying grounding conductor, I found that its landed to nearest plumbing pipe. Electrical codes require a grounding conductor to the water main street side pipe. Rough in raceways and conductor from panel to street side water main and trim conductor for proper grounding.</i>

	<i>Description: 200 AMP Panel Upgrade</i> <i>* Installation of a new 200 Amp main breaker and a 40 -Spaces 80 -Circuit Eaton panel, positioned no more than 5 feet from the existing location.</i> <i>* Installation of new 2" rigid conduit between the meter box and the new panel.</i> <i>* Running of wire number 3/0 between the meter box and the new panel.</i> <i>* Implementation of a main ground and bonding system (both interior and exterior). The interior grounding will include a new conduit run from the panel to the water line, with connections to the hot water, cold water, and gas pipe.</i> <i>* Provision of exterior grounding and ground rods as required by code.</i> <i>* Labeling of each breaker with the correct house circuit.</i> <i>* Installation of a plywood moisture barrier behind the panel, along with duct seal in the 2" conduit.</i> <i>* Keep of the existing exterior meter box.</i>				
	<i>Parts and labor are included.</i>				
MISC-1294-2025	MISCELLANEOUS	PLUMBING	ISSUED	09/05/2025	1210 E OGDEN AV, NAPERVILLE, IL 60563
	<i>Description: Some of the sewer has been replaced across the parking lot. From the edge of the building there is Sdr (plastic sewer pipe) Running from the building to approximately 175' into the lot towards the rear fence. There is a cleanout in the lot located at approximately 100' we found this cleanout under dirt within the lot. 75' from the cleanout in the lot is where we were able to reach the existing cast iron. The cast iron is in very poor condition and needs replacement. The cast iron extends from the sdr/cast transition at 175' from the building and continues to the manhole on the other side of the fence. The distance from the sdr to cast transition is another 120'. We will be replace all remaining cast iron from the transition to the manhole. This will greatly reduce the likely hood of clogging. Once all cast iron has been removed and replaced from the transition to the manhole we will remove and dispose of all spoils and backfill to grade with gravel. We will cut through and remove the fence as necessary. We will dispose of any fencing we remove. Bes stated the fence is going to be ripped out and removed due to its overall poor condition. APH will not be responsible for any asphalt repairs afterwards, Final grading, Landscaping/Grass or fence restoration. The proposed section of repair is approximately 120' long and 4' deep. This estimate includes, the sewer repair. Trucking fees for transportation of asphalt and spoils to different locations for disposal. Trucking fees to haul in stone to bed pipe and make the parking lot safe after work is completed as it must be filled to grade. Cutting of the parking lot for access. Tying into the existing manhole and sealing connection with mortar and tar.</i>

MISC-1421-2025	MISCELLANEOUS	PLUMBING	FINAL INSPECTION PASSED	09/25/2025	2430 RIVERMIST CT, NAPERVILLE, IL 60565
<i>Description: We are going to this home to perform a sewer repair. The quote is as follows:</i>					
<i>"Excavate front yard on the left corner of the home, expose sheered 4" cast iron sewer at foundation wall. Replace approximate 10' section of 4" cast iron with schedule 40 pvc, this penetration through the foundation will be sealed with hydraulic cement and waterproofed with tar. This repair will be permitted and inspected by the city of Naperville. We will install a full size 4" pvc clean out, within 5' of the foundation wall, to comply with updated plumbing code revisions. This will allow for easy access to the sewer for future maintenance and cleaning. We will remove the small tree, mulch, and two fern bushes from our excavation area. The brick garden bed edging will be removed and placed outside of the excavation area. This estimate also includes replacement of the 1" main shut offs before and after the water meter, as well as removal and disposal of the water softener.</i>

CONTRACTOR LIST FOR PERMITS ISSUED (09/01/2025 TO 09/30/2025)

Permit #	Type	Workclass	Status	Issue Date	Main Address
<i>Description: We are going to this home to perform a sewer repair and descaling</i> <i>THE TRAILER IS NEEDED AT THIS SEWER REPAIR</i> <i>The quote states "This price includes the installation of a 6" non directional cleanout and descaling the cast iron under the basement slab. The customer is aware a section of sidewalk may have to be removed in order to complete this scope of work due to the depth of the sewer. If this is the case, we gave a separate quote to remove the slab of sidewalk, fill it to grade with gravel, and pour a new concrete slab. We will try to avoid this but it may have to be done. We also do not know if they poured concrete on the sewer from the over-dig. If this is the case, the price will be adjusted accordingly. All of the spoils will be left on site and the bushes in the garden area are going to be removed on the day of the dig. We will then descale the entire sewer and remove all of the leftover scale from the line with the jetter rear facing nozzles. It is 6" Sdr all the way to the city sewer and it is in good condition. The sewer will be camera scoped at the end to ensure all of the scale is removed from the cast iron and to ensure there are no flat spots in the sewer."</i> Plumbing Contractor: Andersen Plumbing & Heating 24 Oakhill Drive, Oswego, IL 60543 (630)554-8496 permits@andersenph.com

ROW-0145-2025	RIGHT-OF-WAY	RIGHT-OF-WAY	ISSUED	09/17/2025	
<i>Description: Per IEPA's Site Remediation Program request, environmental borings and accessing existing groundwater monitoring wells in the ROW is proposed. CS Drilling of Naperville, IL, an IL licensed drilling subcontractor will advance 2 near slab soil vapor points approximately 1 foot in diameter and 3 feet in depth and 3 soil borings 2 inches in diameter and approximately 15 feet in depth will be advanced in the ROW. A private utility locator will be subcontracted to clear utilities as well as a public locate via JULIE. The borings will be backfilled with bentonite chips, the soil vapor points will be removed after sampling, and the locations will be returned to grade matching the conditions before the work was conducted. The current groundwater monitoring wells (up to 10) will be accessed and sampled in the ROW. Groundwater sampling does not include invasive procedures. Traffic control to protect workers in the ROW would include blocking off certain parking spots, as well as shutting down the sidewalk for a limited amount of time. Please see the attached fig for the boring locations.</i>
