PERMITS ISSUED BY WORK CLASS (01/01/2026 TO 01/31/2026)

Description: The proposed project consists of a kitchen remodel and interior reconfiguration within the existing residence. Work includes selective demolition, minor framing modifications, new finishes, and limited electrical and mechanical updates. No exterior additions are proposed, with only minor exterior modifications. No changes will be made to the existing plumbing fixture locations.

1. Interior Reconfiguration & Framing

- Enlarge the existing kitchen by moving one non-load-bearing interior wall approximately 4 feet to increase floor area.
- Convert the original dining room into an office.
- Construct a new walk-in pantry adjacent to the kitchen.
- Add a built-in cubby/mudroom area near the front entry.
- Modify the fireplace wall by removing portions of the existing brick hearth to accommodate new cabinets and shelving on both sides of the existing fireplace (fireplace unit itself remains unchanged).
- Square off the existing kitchen window bump-out to create a flush interior wall surface suitable for additional cabinetry and buffet/bar area.
- Recess the refrigerator into the adjacent wall cavity (no structural changes to exterior walls).

2. Mechanical, Electrical, & Plumbing

Plumbing:

- No major plumbing relocation. Kitchen sink and adjacent bathroom fixtures remain in existing locations.
- Relocate dishwasher to the left side of the sink (within same cabinet run).
- Cap and safely abandon the existing gas line previously serving the range.

Electrical:

- Install a dedicated 240V circuit for a new induction range.
- Install new recessed lighting throughout the kitchen; add wall sconces as noted.
- Relocations and addition of some new receptacles and light switches.

Mechanical / Ventilation:

- Install a new vent hood above the range, ducted to the exterior.

3. Finishes & Cabinetry

- Install new hardwood flooring throughout the kitchen and adjoining spaces, with new tile flooring at the front entryway.
- Install all-new kitchen cabinetry, including pantry shelving, buffet/bar cabinetry, and built-ins flanking the fireplace.
- Patch, repair, and finish walls and ceilings as required for all new work.
- Standard painting and trim installation throughout affected areas.
