

Meeting Summary
Accessible Community Task Force
April 6, 2022

On Wednesday, April 6, the Accessible Community Task Force (ACTF) hosted a meeting with representatives from the Gorman & Company, LLC and Mercy Housing Lakefront teams. The ACTF members asked many clarifying questions of both development teams to appreciate the concepts introduced in their written proposals. Topics included transportation, affordability, universal design features and quality of supportive programming.

The ACTF concluded the meeting by summarizing that the most important measure of success, particularly for those residents with intellectual and developmental disabilities, will be that the project creates a place that they are proud to call “home.” To explain, it must be a place that residents can easily and joyfully bring their families and friends to visit; a place residents feel comfortable and have a real sense of community belonging.
