

# A Bright Idea

60,000 Customers • 100 Employees • Outstanding Reliability  
Community Owned Public Power Utility

## Naperville owns its electric utility

Naperville has owned its Electric Utility since 1899, celebrating 120+ years of reliability and continuous improvement, bringing power to more than 60,000 customers each month.

Features of your locally-controlled utility:

130, 730, 735 kilowatt hours of electricity were purchased in July 2023.

Naperville buys its electricity through the Illinois Municipal Electric Agency (IMEA).

95% of Naperville's electric infrastructure is underground.

This increases reliability because it is less prone to weather and other damage versus overhead.

Naperville residents enjoy competitive electric rates.

Naperville's Electric Utility is at the forefront of new technologies designed to keep the power on and to respond to outages more quickly.

## Shedding some light on reliability

Naperville recorded 86 outages from April to June 2023. The breakdown of causes are:

### TOTAL MILES OF ELECTRICAL CABLE

1,269 miles

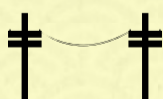

### Underground

1,166 miles

### Overhead

103 miles

If all this electrical cable were laid end-to-end, it would stretch as far as Billings, Montana.
