

Naperville Renewable Energy Program

Create a Better Tomorrow

You can make a difference for future generations by choosing to enroll in the City of Naperville's Renewable Energy Program. This impactful program makes it possible for Naperville residents and business owners to purchase clean energy produced through natural means such as wind and solar. Through your participation, for as little as \$5 per month, you are supporting energy independence and business development in Illinois.

Many similar communities have successfully made a difference using renewable resources. As a community, we can unite behind this effort, which has an environmental equivalent to planting more than one million trees or not driving 15 million miles per year.

Create a better tomorrow and sign up for the City of Naperville's Renewable Energy program today.

How It Works

An additional charge of as little as \$5 to your monthly electric utility bill covers the added expense of delivering 200 kilowatt hours (kWh) of clean and renewable energy to Illinois' electric grid. You are insured the same quality and reliable electric service that you always receive.

To get started, fill out the form below and either mail it, drop it off in person at the City's Finance Department, located in the Municipal Center, 400 S. Eagle St., or fax it to (630) 305-6226.

For more information, call the Finance Department at (630) 420-6059 or visit <https://www.naperville.il.us/renewable>.
