Program Guide

Smart Thermostat Rebate

The Naperville Electric Utility is offering a $75 rebate to residential utility customers (both homeowners and renters) when they buy and install a smart thermostat. Rebates will be issued as utility billing credit. Limit two rebates per customer. Thermostat purchase prices under $75 per unit before tax are NOT eligible for any reimbursement.

100% complete applications with required documentation must be received <u>within 120 days of installation.</u> If the smart thermostat was purchased more than 120 days prior to application submittal, proof of installation date may be required, either via an invoice from the installer or an installation confirmation email indicating the time of setup.

Rebates will end when all funding is expended. Projects PURCHASED OR INSTALLED in the calendar year when all funding is expended will NOT be eligible for future incentives.

Documentation must include:
- A copy of your **dated**, **itemized**, **paid** purchase receipt.
- Proof of Wi-Fi capability. You may find this on your app at: Settings -> Technical Info -> Display
- A .jpg or .pdf photo/copy of the UPC code indicating the model number and serial number of the smart thermostat

For questions about the Smart Thermostat rebate program contact Payton Schield at SchieldP@naperville.il.us or (630) 305-5357.
