

### Why is Project Needed?

- Roadway is not wide enough for traffic needs
- Difficult for residents to turn onto roadway during rush hour
- No continuous pedestrian / bike facilities
- High accident rates due to congestion and substandard lighting

### How Will the Road be Improved?

- Widen roadway to 2 lanes in each direction
- Fit project within the existing surroundings
- Add shared use path along south side
- Improve roadway lighting
- Add permanent traffic signal at Genesee Drive and Frontenac Road
- Maintain one lane of traffic in each direction and access to businesses throughout construction

### Why Was This Alignment Chosen?

- Road widening to the south, away from residential properties
- Avoids impacts to Country Lakes Park and protected wetlands
- Improves construction staging to expedite project
- Minimizes utility relocations
- Public support
